

LIVING WITH HEMIPLEGIA DOESN'T MEAN LIVING HALF A LIFE...

HemiHelp was set up in 1990 by a small group of parents, and now has a thriving membership of over 4000 families and professionals. We aim to promote the rights and wellbeing of children and young people with hemiplegia by providing information and support for them and their families and by raising general awareness of the condition.

We estimate that there are around 13,000 children with hemiplegia in the UK and Ireland. We are currently providing support and advice to around one-third of these.

Our aim is to reach all of them.
